ACKNOWLEDGEMENTS

This directory counts on the efforts of several individuals. Credit goes to those people who contributed immensely to the development of this source of information in water supply and sanitation and made its production possible.

Mr. Paul Saka Chikombe, a Senior Documentalist at NETWAS was instrumental in the process of gathering, analysis, editing and the final product. Other people who contributed in one way or another are Boaz Adaji Saava, David Mulonzia Kilonzo and Miss. Rhoda Kioni. They had the difficult task of collecting data from the respondents scattered all over the country. They encountered a number of challenges and their patience and devotion proved useful in ensuring a good coverage of the target institutions. To all these persons mentioned above, NETWAS is greatly indebted.

Special thanks go to Swiss Agency for Development and Cooperation (SDC) who provided financial support and thus enabled this directory to be developed. The investment put into the production of this document will continue to bear fruits through the continued use by the actors in water supply and sanitation sector.

NETWAS hopes to continuously update this directory in the future in order to keep it in pace with the developments in the sector. We welcome suggestions and proposals.

**Wilfred M. Ndegwa, Programme Manager
Networking and Information Services**

FOREWORD

NETWAS mission is to improve the living conditions of the people of Eastern Africa particularly the poor. With its operations dating back ten years ago in 1986, NETWAS has been able to address the water supply and sanitation issues with a considerable degree of success through specialised programmes in training, consultancy, advocacy, networking and information dissemination services.

NETWAS realises the important role information dissemination plays in the sector. Over the years, NETWAS has responded to the needs of sector institutions by conducting seminars/workshops in information management in a number of countries in the region. Assistance has also been provided in form of donation of information materials through support from donors especially the Swiss Agency for Development Cooperation—SDC. The aim has also been to disseminate valuable experiences and lessons learnt from development projects and research undertaken in the region.

NETWAS has a well established documentation centre with a wide collection of documents on water supply and sanitation. These include journals, audio-visual materials, books, monographs, grey literature, and conference proceedings all focusing on rural and peri-urban water supply and sanitation sector. The materials cover a wide range of subjects, including technological options (appropriate and low cost), project sustainability, community management, gender, socio-economic issues, etc. The centre is also linked to global information databanks in all parts of the developed world where a number of retrospective searches can be made for vital information.

As an independent NGO, NETWAS realises the gap in information available to the sector professionals. Field working NGOs, Government Institutions and Donor Agencies lack valuable information retrieval tools which can be pointers to sources of relevant literature in the sector. Lack of such tools has greatly inhibited collaboration and replication of "best practice" or lessons learnt. Instead it has encouraged duplication of research.

The directory of sources of Information and Documentation (Kenya) is one effort to bridge this information gap. NETWAS is keen to promote information networking amongst sector professionals to ensure the sustainability of water and sanitation programmes. This directory contains information on thematic areas of each organization as they relate to water including specific subjects in water supply and sanitation.

It is hoped that this project will be a challenge to all information providers to open up mechanisms to facilitate access to information in various areas for our national development. Arrangements are at hand to prepare similar directories for Uganda and Tanzania in the next two years.

It is my hope and pride that this directory will prove useful in helping forge close links of collaboration amongst those involved in water supply and sanitation projects.

Matthew N. Kariuki, Executive Director
7 November 1996

WORKING LANGUAGE(S): English, kiswahili

GEOGRAPHICAL SCOPE: Provincial (South Nyanza)

MAIN ACTIVITIES: Water Supply and sanitation, evangelism

Past: Community based water supply and sanitation projects, construction of shallow wells

Current: Installation of handpumps, spring protection, drilling of boreholes, rain water harvesting, construction of latrines

Future: Sanplat

SUBJECTS: Engineering and technology, health, sociological and community, water resources, ground water, rain water, water collection, wells, rain water collection, water quality, biological quality, physical quality, chemical quality, analysis, control, standards, water distribution, public standpost, pipes, pumps, networks, water use, water demands, water consumption, water treatment, depositing devices, on-site collection and treatment, pit latrines, water utilisation, waste water disposal

INFORMATION SECTION:

Library Holdings: 245 books, reports, catalogues, directories, journals

Doc/Info Staff: --

Entry: Restricted

INFORMATION SERVICES:

Publications: Annual and other reports, manuals/handbooks, product catalogues, standards/codes of practice

Availability of Information: Information services by arrangement, no charges

Information Supply by: Telephone, photocopies, postal mail, visits, fax

Services Provided: Reference, referral, selective dissemination of information, current awareness services, preparation of bibliographies and reading lists, loans of documents, provision of copies of documents, translations
